Description of Other Released Contaminant:

Approximately 430 barrels of crude oil burned in the fire

Inspected:

Written Report Received: 3/1/2016

Clean Up Concluded: 5/1/2015

Risk Evaluation:

Extreme because of the crude oil and propane tanks that ignited. The wellhead was shut-in and not impacted.

Areal Extent:

Potential Environmental Impacts:

Fluids from the tanks was contained within the facility berm. Materials from the hot oil truck were contained within the berm of the location surface near the facilities. Surface soil in the vicinity of the fire was contaminated.

Action Taken or Planned:

NO injuries resulted from this incident. The investigation will review events leading up to and following the extinguishing of the fire. Local fire contained the grassland fire off the location and observed on stand-by as the facility tanks and hot oiling truck burned. Night fire watch and perimeter crowd control was established. The facilities will be removed and the pad surface soil over-excavated prior to the re-building of the facility. Additional training may be conducted as a follow-up.

Wastes Disposal Location: The recovered waste material will be transported to a ND licensed disposal facility.
